ERP 1000 Series

Angle Encoders
without Integral Bearing

09/2020

ERP 1000 series

- **Very high resolution and accuracy**
- **Low mass and low mass moment of inertia**
- **Consisting of an AK scanning head and TKN circular scale**

Signal-quality indicator

The ERP 1010 and ERP 1070 modular angle encoders feature an integrated signal-quality indicator with a multicolor LED, permitting fast and easy signal-quality checks during operation.

This feature provides a number of benefits:
- Scanning-signal quality visualization via a multicolor LED
- Continuous monitoring of incremental signals over the entire angular measurement range
- Indication of the reference-mark signal behavior
- Quick signal-quality checks in the field without additional aids

The built-in status indicator permits a reliable assessment of the incremental signals and inspection of the reference mark signal. The quality of the **incremental signals** is indicated by different colors. A blue LED indicates traversal of the reference mark.

ERP 1010 and ERP 1070:
Signal-quality indicator in the interface electronics

LED indicator for incremental signals

LED color	Quality of the scanning signals
●	Optimal
●	Acceptable
●	Unsatisfactory

In the encoders with a serial interface (ERP 1010), an error bit is set when a red LED is displayed. Error bits can be displayed and cleared with the ATS mounting wizard.

LED indicator for the reference mark signal
When the reference mark is traversed, the LED briefly switches to blue. In the ERP 1070 encoders, the LED can also be used for checking the reference mark signal:
- ● Out of tolerance
- ● In tolerance

LED indicator for control margin
In the encoders with a TTL interface (ERP 1070), a flashing LED (briefly goes dark every 2.5 s) indicates when the control margin of the scanning ASIC (HSP) is nearly exhausted. Clean the measuring standard and the scanning window of the scanning head in compliance with the relevant information in the mounting instructions. The encoder may also need to be checked for correct mounting.
